Deep Think with Confidence

Fu, Yichao, Wang, Xuewei, Zhang, Hao, Tian, Yuandong 等

The Fourteenth International Conference on Learning Representations (ICLR 2026), poster (previously arXiv preprint arXiv:2508.15260; also NeurIPS 2025 Efficient Reasoning Workshop spotlight), 2026

正式頁面 · PDF 直連

已修正: Venue is stale and the author list is incomplete for the published version. (1) The work is no longer just a preprint: it was accepted to ICLR 2026 as a poster (<https://iclr.cc/virtual/2026/poster/10011210>, session Fri 24 Apr 2026), and earlier appeared as a NeurIPS 2025 Efficient Reasoning Workshop spotlight. Cite as @inproceedings ... book-title={International Conference on Learning Representations}, year={2026} rather than @misc/arXiv. (2) The ICLR 2026 version lists FIVE authors - Yichao Fu, Xuewei Wang, Hao Zhang, Yuandong Tian, Jiawei Zhao - whereas the entry (matching arXiv v1, 21 Aug 2025) omits Hao Zhang. (3) year=2025 should be 2026 if citing the conference version. The arXiv id 2508.15260 and the four listed names are themselves correct for the v1 preprint, so nothing is fabricated.

Whose Vote Should Count More: Optimal Integration of Labels from Labelers of Unknown Expertise

Whitehill, Jacob, Ruvolo, Paul, Wu, Tingfan, Bergsma, Jacob 等

Advances in Neural Information Processing Systems 22 (NIPS 2009), pages 2035–2043, Curran Associates, Inc., 2009

正式頁面 · PDF 直連

已修正: AUTHOR ORDER IS WRONG. I downloaded the published PDF and extracted page 1; the printed byline reads verbatim: ‘Jacob Whitehill, Paul Ruvolo, Tingfan Wu, Jacob Bergsma, and Javier Movellan’ (Machine Perception Laboratory, UC San Diego). The entry lists Ruvolo LAST instead of SECOND: ‘Whitehill, Wu, Bergsma, Movellan, Ruvolo’. Ruvolo is the second author of this paper (the well-known GLAD model) and demoting him to fifth misattributes credit. dblp (conf/nips/WhitehillRWBM09 - note the initials R-W-B-M in the key) and Semantic Scholar both use the correct printed order. Caveat worth knowing: the auto-generated BibTeX served by proceedings.neurips.cc repeats the same wrong order (it was built from the PDF’s XMP /Author metadata field, which disagrees with the typeset byline), so whoever wrote this entry probably copied it in good faith from NeurIPS - the printed paper is authoritative. Also minor: the surname is typeset ‘Tingfan Wu’ (not ‘Ting-fan Wu’), and the printed byline gives no middle initials, so ‘Javier R. Movellan’ / ‘Paul L. Ruvolo’ are embellishments (harmless, both are the authors’ real full names). Title, booktitle, year, publisher and pages 2035–2043 are all correct. No DOI exists for this paper (pre-DOI NIPS volume); the Curran/ACM DL surrogate 10.5555/2984093.2984321 is an ACM collection identifier, not a real registered DOI, so do not add it.

Measuring Mathematical Problem Solving With the MATH Dataset

Hendrycks, Dan, Burns, Collin, Kadavath, Saurav, Arora, Akul 等

Proceedings of the Neural Information Processing Systems Track on Datasets and Benchmarks 1

(*NeurIPS 2021 Datasets and Benchmarks Track, Round 2*). Preprint: *arXiv:2103.03874*, 2021
正式頁面 · PDF 直連

已修正: The work is real and title/authors/year are exactly right, but the entry is typed wrongly: it is an @article with journal = {NeurIPS Datasets and Benchmarks}, whereas this is a conference-track proceedings paper. Use @inproceedings with booktitle = {Proceedings of the Neural Information Processing Systems Track on Datasets and Benchmarks 1 (NeurIPS Datasets and Benchmarks 2021)}. Also missing a url/eprint field (*arXiv:2103.03874*). The note is accurate: MATH-500 is the 500-problem test subset released by Lightman et al., ‘Let’s Verify Step by Step’ (*arXiv:2305.20050*, later ICLR 2024) in the PRM800K repo — if that subset is what the paper actually evaluates on, Lightman et al. should be given its own full citation rather than living only in a note. No DOI exists for the Datasets and Benchmarks proceedings entry, so do not add one.
